EDUCATION

Daffodil International University

B.Sc. in Computer Science and Engineering

Ashulia DSC Savar, Dhaka

Jan 2022 - 2025

Cox's Bazar Gov't. Polytechnic Institute

Diploma in Computer Engineering

Jan 2017 - 2020

DEVELOPMENT SKILLSET

Languages: JavaScript (ES6+), TypeScript, C

Frontend: React.js, Tailwind CSS, HTML, CSS

Backend: Node.js, Express.js, Socket.io

Databases & Storage: MongoDB, MySQL, Cloudinary

Security & Auth: JWT, Clerk, API Security

Tools & Deployment: Git, GitHub, Version control, Postman, Swagger, Vercel, Render

Familiar with: Docker, Redis.

PROFESSIONAL HIGHLIGHTS

16+ months of self-directed experience designing and deploying scalable full-stack applications.

Versatile technical stack backed by 9+ self-delivered projects and active GenAI exploration.

Autonomous execution and rapid learning focused on user-centric, business-aligned solutions.

PROJECTS

❖ Learning Management System (Full-Stack)

[Live Link](#) | [Client Code](#) | [Server Code](#)

LMS with: course publishing, enrollment, streaming, ratings, Clerk auth, Stripe sandbox.

Features

- Role-Based Access: Educator vs. Student (Clerk)
- Course Publishing: Create/publish, rich text (Quill), YouTube
- Student Experience: Browse, enroll, streaming, progress, ratings/reviews
- Payments: Stripe sandbox (webhooks-ready)
- Media & UI: Cloudinary, Tailwind
- Security: dotenv, CORS, Nodemon
- API Testing: Postman

Technologies

- Frontend: React, Vite, Tailwind, React Router, Quill, YouTube, unid, rc-progress, starrating
- Backend: Node.js, Express, MongoDB, Clerk, Stripe (sandbox), Cloudinary

❖ **Real-Time Chat Application (Full-Stack)** [Live Link](#) | [Client Code](#) | [Server Code](#)

Chat - App: delivers messages instantly to recipients without page reloads. Includes signup/signin authentication and live online activity indicators. Short, smart, and professional.

Features

- Real-time messaging: Bidirectional, instant.
- Online presence: Live indicators.
- Authentication: Sign up/in with JWT.
- Media messaging: Image/videos storage.
- Deployment-ready: Frontend + backend for deployment.
- Responsive UI: TailwindCSS.

Technologies

- Frontend: React, TailwindCSS, Socket.io-client, Vite, JWT (client-side token handling)
- Backend: Node.js, Express, Socket.IO (server), MongoDB, bcryptjs, JWT, Cloudinary, dotenv

❖ **Bank Transaction System (Backend API)** [Link](#) | [Code](#)

Production-oriented financial transaction backend built for high reliability and secure data handling.

Features

- Idempotent transfers with MongoDB session-based commits, rollbacks, and explicit debit/credit audit entries.
- JWT authentication featuring token blacklisting and TTL indexing for secure logouts.
- Automated email notifications integrated via Nodemailer (SMTP).
- Modular architecture enforcing clean separation across controllers, routes, models, and services.

Technologies

- Backend: Node.js (ES Modules), Express
- Database & ODM: MongoDB, Mongoose
- Auth & Security: JWT, Token Blacklist
- Integrations: Nodemailer
